Description

Power Supply: 110V/220V
Power: 17W
Treat Airflow: 3000m³/h
Wind Drag: <30pa
Sterilization Rate (1h): >= 96.3%
Dimension: 165x145x385mm

1 YEAR WARRANTY

We will install and service it for you.

Breathing. It's so central to our existence, so part and parcel of what it is to be alive, that our bodies have learned to breathe without us even thinking about it! Normal rates of respiration for resting adults is between 12 to 16 breaths a minute.

So what happens when the air that we breathe, the substance that fuels our bodies is compromised? Research has shown that poor air quality is linked with a range of health concerns, from short term irritation like headaches and fatigue to long term effects such as aggravated asthma. Further research also suggests that a 'growing body of scientific evidence has indicated that the air within homes and other buildings can be more seriously polluted than the outdoor air in even the largest and most industrialized cities'.

That's 12 to 16 times a minute that we inhale not just the good but also the bad of the air around us – toxins, chemical, dust, pollutants.

Here at Sanitizeexperts.ae , we've long recognized the need for quality air by providing the best in a range of air purification products for buildings and homes.

Protect your health and reduce exposure to harmful bacteria and viruses by buying any one of these affordable and easily installed featured devices below.
